The figure is a dot plot representing the distribution of 1000 observations over time on a specific date. The x-axis, labeled 'Time of Day', ranges from 02 to 22 with major ticks every 4 units. The y-axis, labeled 'Date', shows the date '2021-04-14'. The data points are clustered into four distinct time intervals, each represented by a different color: red for the morning (approx. 06:00 to 08:00), green for the afternoon (approx. 11:00 to 13:00), cyan for the evening (approx. 18:00 to 19:00), and purple for the late evening (approx. 19:00 to 20:00). The density of dots is highest in the morning and afternoon clusters.

The dot plot displays the distribution of Time of Day for the date 2021-04-15. The x-axis represents the Time of Day, ranging from 02 to 22. The y-axis represents the Date, which is 2021-04-15. The data points are clustered at approximately 01:00 (red), 07:00 (yellow), 12:00 (green), 18:00 (blue), and 23:00 (purple).
