The figure is a horizontal dot plot with a light grey background and vertical grid lines. The x-axis is labeled 'Time of Day' and ranges from 00 to 24 with major ticks every 4 hours (00, 04, 08, 12, 16, 20, 24). The y-axis is labeled 'Date' and has a single tick for '2020-11-01'. Data points are represented by colored dots, each with a horizontal error bar indicating a range of time. The activities and their corresponding time ranges are: 'Sleep' (pink dot at 00:00, range 00:00-01:00), 'Waking up' (yellow dot at 01:00, range 01:00-02:00), 'Eating' (green dot at 08:30, range 08:00-09:00), 'Working' (cyan dot at 12:30, range 12:00-13:00), 'Commuting' (grey dot at 16:30, range 16:00-17:00), 'Leisure' (blue dot at 17:30, range 17:00-18:00), and 'Personal care' (purple dot at 20:30, range 20:00-21:00).

The figure is a horizontal dot plot representing the distribution of time of day for 1000 COVID-19 cases on the date 2020-11-02. The x-axis, labeled 'Time of Day', ranges from 0 to 24 with major grid lines every 4 hours (02, 06, 10, 14, 18, 22). The y-axis, labeled 'Date', shows the date 2020-11-02. The data points are colored dots, with each color representing a different time bin. The distribution is bimodal, with a primary peak around 02:00 (pink dots) and a secondary peak around 22:00 (pink dots). There are also smaller clusters of dots at various other times throughout the day, including 04:00 (orange), 08:00 (yellow), 12:00 (green), 16:00 (cyan), 18:00 (blue), and 20:00 (purple).
